

## Cutting Cornerstones

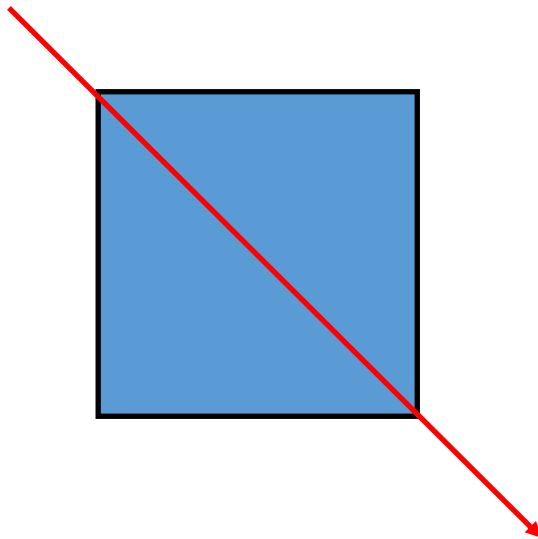

So, what do you do when you love one of our Kaleidoscope Kits, but are not in love with the color or print of the cornerstones ????

You can very easily cut your own and here's how:

For our 10" Blocks, just cut some 4"x4" squares and then cut them on the diagonal and that's it.

For our 5", 6" or 7" Blocks, just cut the squares to 3.25" and cut on the diagonal.

Keep in mind that for every Kaleidoscope Block, you will need 4 corners, so you can double or quadruple your fabric to make it easier.
